

Immigration Attorney Red Deer

Immigration Attorney Red Deer - Nowadays there is increasing concern about privacy issues and the complexity of new privacy legislation. Individuals and organizations which supply or develop biotechnology or information technology have various legal requirements. So do people who rely on technology so as to secure a competitive advantage for their company, or just to be able to function in day-to-day operations. Our Technology, Privacy and Intellectual Property lawyers help clients in maximizing the use of intellectual property in their business operations. Our objective is to be able to create value for our clients.

We offer several legal services handling matters connected to biotechnology, intellectual property and privacy technology from an international to a local basis. Our assistance comprise privacy, trade-marks, copyright, domain names, e-commerce, commercialization, intellectual property, information technology and operational problems.

Intellectual Property Services:

- Copyright
- Industrial Designs
- Licensing
- Trade Secrets
- Trade-marks

We help clients in enforcing, obtaining and maintaining intellectual property rights on a national, international and regional scale. Our clients come from various industries such as entertainment, automotive, manufacturing and telecommunications.

Technology Assistance:

- e-commerce initiatives
- protection, development, licensing, distribution and sale of technology
- acquisition of technology

We advise venture capitalists and financial institutions in structuring loan transactions to both users and suppliers of technology. We likewise advise companies about confidentiality agreements, internet usage and computer system policies, outsourcing arrangements, consulting agreements, employment agreements, source code escrow, strategic alliances and joint ventures.

Privacy Services:

We help employees, organizations, contractors and suppliers to guarantee compliance with privacy legislation. We assist organizations with their personal information management systems: drafting comprehensive privacy procedures and policies; advising with respect to the use, collection and disclosure of personal information. We evaluate Privacy Impact for clients' businesses or organizations.
