

Securities Lawyer Red Deer

Securities Lawyer Red Deer - Our clients require our services to help them in accessing both the private and public capital markets. We provide recommendation about the accumulation of money in the applicable structures of securities laws, regulations, and policies. Both underwriters and issuers are part of our client base, looking for help with offerings of debt and equity securities. Additionally, we even act for investors and issuers regarding seed capital and venture capital offerings and private placements. Our office could even assist our clients in meeting applicable continuous disclosure and yearly meeting requirements.

Another primary aspect of our company is our agency practice, which includes us acting for law companies all around the country. We help in the completion of cross-jurisdictional transactions, which often requires us to evaluate a transaction from the point of view of regulatory compliance, sending whatever essential applications to the Securities Commission, and meeting with workers at the Commission.

Local and national publicly traded issuers, venture capital funds, independent corporate finance firms, the securities divisions of chartered banks, law firms, portfolio managers and investment counsel, and mutual funds consultants are all amongst our diverse client base.
