

Legal Aid Lawyers in Red Deer

Legal Aid Lawyers in Red Deer - Energy law for the emerging world of energy markets is our company's specialty. There are several challenges as well as new opportunities for our company to help assist our many clients in taking advantage of this new world. Our energy law group provides a comprehensive array of legal services to national and global energy clients. We serve everyone from start-up companies to major corporations. Whether your company offers solar energy technology or more traditional types of energy generation, both have complex transactional requirements. We provide practical and sound suggestion and representation drawing on a depth of knowledge of the economic, political and legal issues involved in energy concerns.

1. Connected to the field of renewable/alternative energy technologies, we could help with new developments in fuel cells, solar, wind, hydropower, biofuels, biomass and geothermal. In the case of the solar energy business, we act for developers, manufacturers, and users in preparation of land and roof release, tax matters, development agreements, financing agreements with investors, legislative and regulatory matters, and commercial arrangements;
2. We are involved in energy efficiency demand management and cogeneration projects in commercial, industrial and institutional contexts, including construction, financing and engineering problems;
3. We provide suggestion to private and public entities in respect of new statutory requirements to complete energy plans, and their land use plan integration;
4. For energy projects we help to negotiate and structure joint venture arrangements, project financing, acquisition and transfer and licensing arrangements;
5. Within the early stages of commercialization and financing of clean technologies, we can provide numerous services to assist;
6. We assist with approval and compliance with new energy and environmental law requirements (consisting of carbon management and disclosure);
7. We assist to create, protect and commercialize intellectual property rights;
8. We can help in initial public offering opportunities, venture capital opportunities, private equity;
9. For concerns like "leave to construct" applications for both gas and electricity infrastructure, we could represent clients at hearings before agencies and regulatory commissions, creation of independent transmission businesses, licensing, setting of rates, approvals, compliance issues and permitting
10. We counsel board of directors and senior management on issues of corporate governance and disclosure, climate change, environmental stewardship and liability matters, evolving regulatory issues, and, where appropriate, assisting in representations to governments.
